Reuse

Everything must be in good condition!
To find a recycler, consult our *Bottin vert* on our website ritmrg.ca

Clothing and textiles

Toys

Dishes

Books

Compost

Organic materials: food, green waste, soiled paper and cardboard

All that can be eaten

Fruits and vegetables Milk products Egg and nut shells

Bread, pasta and other cereal products

Coffee grounds and filters, tea bags

Tables scraps

Meat and poultry

Fish and seafood

To avoid odours, place organic matter in a paper bag or wrap meat, fish and seafood in newspaper.

Green Waste

Dead leaves

Branches

Grass cuttings

Others

Paper towels and paper tissues

Soiled paper and cardboard products

Compostable tableware

Animal litter

There's a lot less REAL WASTE!

Check out *Ça va où* to find out everything about the materials accepted in the bins.

Ecocenter

Green Waste

Metal

Tires

Recyclable materials
Occasional surplus

Oversized items

Hazardous household waste (HHW)

Construction, renovation and demolition waste (CRD)

End-of-life electronics

Recycling

Containers, packaging and printed materials.
According to the guidelines of Éco Entreprises Québec.

Containers

Packaging

Printing

- Empty and lightly rinse the containers.
- Take apart and fold your cardboard boxes.
- Separate the materials that make up the packaging (e.g., remove the bag from the cereal box).

Garbage

Only if it can't be reused, recycled, composted or recovered!

Clothing and textiles

Personal hygiene products

Others

Collection guidelines

- 1 Leave a two-foot clearance around the bin (between a fence, a car or even another bin).
- 2 Write your street address on each of your bins. (This will help us to correctly identify them).
- 3 Take out your bin the day before scheduled pickup. Why? Because the truck can pass as early as 6 a.m.
- 4 Ensure that no materials are sticking out or are on the ground next to the bin.
- 5 If there are two collections on the same day, place the brown bin so that it will be seen first by the driver
- 6 Wheels pointing towards the house.
- 7 To find out how to proceed in case of damage, call us or visit our website ritmrg.ca as soon as you notice the problem.
- 8 Placed at a maximum distance of 10 feet from the white pavement line, neither on the sidewalk nor on the street.
- 9 Put out garbage or recycling bin only when it is full.

In Winter

Place your bin at a distance of approximately 10 feet from the white line to prevent damage from the snowplow.

In the event of a winter storm, collection may be delayed. Keep an eye on our communications.

The incentive-based pricing

Why are we still talking about this?

Inside the technical landfill site, waste is buried in cells that have a lifespan of five years—and they are becoming increasingly expensive! This has an impact on the annual tax.

A tax calculated based on our annual waste generation?

In 2026, major waste generators will face an additional tax. This targets households that put out more than one waste bin for collection.

If you are in a situation that justifies using a second waste bin (caregiver responsibilities, large family, daycare): Please let us know.

Current pricing regulations states that an additional tax is applied to households that put out more than one waste bin for collection (section 3.a).

Want to avoid this surtax in 2027?

Contact us at 418-385-4200.
